Did you know...

That your putting constitutes 30 and 50% of all your strokes during a round of golf.

Putting practice

ClockGolf is the game that can be built at home in the garden, in the company or near the golf course clubhouse. ClockGolf can be played by everyone between the age of 3 and 100 and will considerably improve your putting, in a fun and challenging way.

The Rules of ClockGolf

1. Start at 1 o'clock, no further than the length of a putter's head from the edge.
2. Count how many puts it takes you to reach the hole.
3. Continue this way round the clock 2, 3, 4 etc until all 12 holes have been played.
4. Add the 12 scores together.
5. All players are scratch players . i.e. without handicaps.
6. The ball is out of bounds when it lies beyond the grassy edge.

Rules are otherwise according to The R&A Rules of Golf

Establishment

ClockGolf is built from exclusive materials. The clock face itself is made from hand-hewn granite and the numbers 1-12 have been sandblasted into the granite. The numbers can be covered with gold leaf or be painted silver or white. The clock-face stone comes in black (Black Galaxy) or grey (China Dark Grey) highly polished granite.

We have made building a ClockGolf course easy. All cobblestones have been glued onto a net, so that the stones are completely fixed. So whether you want to make your own ClockGolf course or wish to make use of our professional landscape gardener, it is easy!

The Green itself has a total diameter of 440 cm and the width of the granite edging is 40 cm.
